Profile

Hello, I'm Ishmaeel, a seasoned Quality Assurance Analyst/Engineer with a diverse background in IT. I have robust experience in testing various software systems, including desktop, mobile, and web applications. My unique perspective, derived from years of experience in web and desktop development, as well as administrative roles in HR and Finance, enables me to understand and test software systems effectively. I'm a quick learner, always striving for continuous learning to stay updated with the latest trends in the dynamic field of Quality Assurance.

Employment History

Quality Analyst, Korbicom

MAY 2022 – PRESENT

- Maintained and configured own and shared test environments.
- Analyzing software requirements and designing detailed test plans, test scenarios, test cases and traceability matrices for desktop, mobile and web software.
- Interpret requirements, system architecture and design documents and media.
- Worked with software build systems and processes and creating and documenting of client releases.
- Performed manual and automated testing of desktop, web and mobile software.
- Was part of a team that developed a test automation solution for our web application using PlayWright coded in Typescript
- Wrote and maintained automated test scripts to improve system efficiency and reduce manual testing

Business Consultant - Test Analyst, Temo Consulting

OCTOBER 2020 – MAY 2022

- Software testing of mobile and web applications
- Creating, reviewing, and maintaining test cases and test artifacts
- Manual testing through integration, system, system integration and regression testing phases
- Planning test activities for the team
- Preparing status reports & tracking progress

Freelance Web Developer, Self Employed

JANUARY 2018 – JANUARY 2020

Freelance web developer & trader. Offering website development and maintenance for personal websites and small to medium enterprises, using the following technologies:

- Html5, CSS, JavaScript
- Node.js, MongoDB, MySQL
- Python, Django, Angular, React

Developer, Condor green

APRIL 2017 – SEPTEMBER 2017

- Web and Desktop Development
- Tech Stack used: ASP.NET, C#, MS SQL
- Created an automated deployment pipeline that allowed for faster and more efficient deployments

Business Administrator, Old Mutual Limited

Hobbies

I like to get out and about and go for a hike. Do some rock climbing, indoors or outdoors, an awesome way to keep fit and have fun. I've loved cars from a young age, which further inspired in me a love for all things mechanical and technical. This fostered my early technical and analytical skills and aptitudes.

JANUARY 2014 – DECEMBER 2014

Business Administration learnership in HR and Finance Departments

- Human resources department exposure
- Employee hiring process, practices and reporting
- Finance department exposure
- Accounting processes, practices and reporting
- Finance Reporting and Financial Advisor training

Development Intern, Temo Consulting

JANUARY 2013 – JANUARY 2014

- Web and desktop development intern/junior
- Tech stack: C#, .NET, ASP .NET
- Wrote technical documentation that enabled other developers to quickly understand the application architecture
- Collaborated with designers, product owners, and other stakeholders to develop user-friendly features that improved user engagement

Education

Higher Certificate, Information Technology, Management College of Southern Africa

JANUARY 2015 – JANUARY 2016

Bachelor of Commerce in Project Management, Management College of Southern Africa

2021 – 2024

Courses
